WHAT IS THE FULL FORM OF CSS?

**1.* The full form of css is
CASCADING STYLE SHEETS**

WHAT IS CSS USED FOR?

USED IT:

***CSS (Cascading Style Sheets) is used to style and layout web pages.**

***for example, to alter the font, color, size, and spacing of your content, split it into multiple columns, or add animations and other decorative features.**

WHAT DO I NEED TO USE CSS?

NEED TO USE CSS:

- * Basic computer literacy, basic software installed, basic knowledge of working with files, and HTML basics (study Introduction to HTML.)**

- * Objective: To understand the basics of linking a CSS document to an HTML file, and be able to do simple text formatting with CSS.**

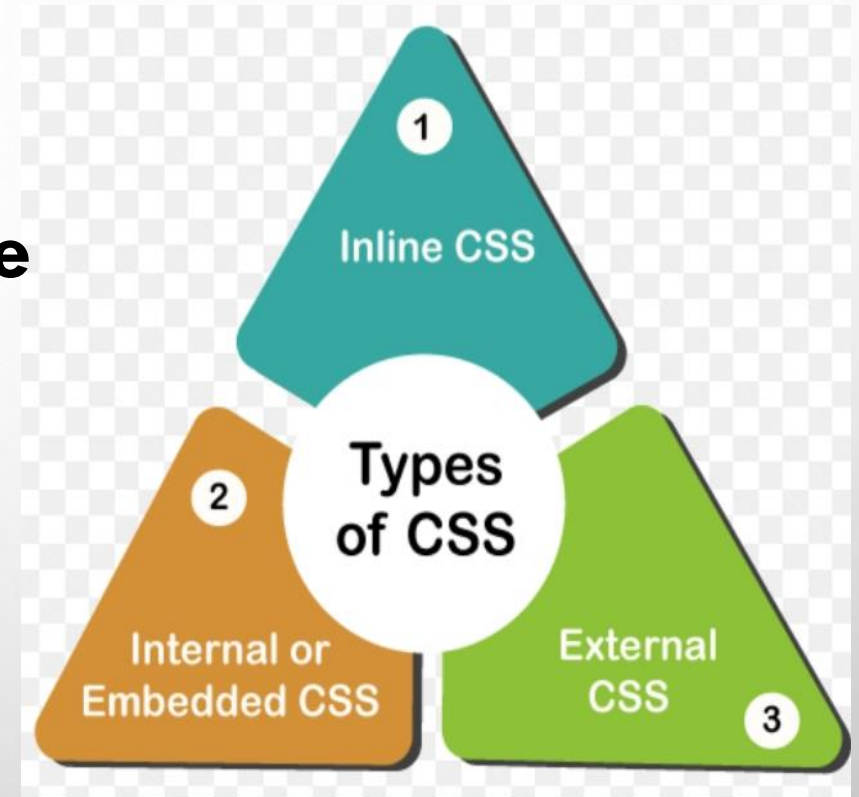

WHAT ARE THE 3 TYPES OF CSS?

There are three types of CSS which are given below:

1. Inline CSS.

2. Internal or Embedded CSS.

3. External CSS.

ADVANTAGE WITH CSS

- * CSS enables consistent styling across an entire website or multiple pages.**
- * This is one of the many advantages of using CSS. By creating a single external CSS file and linking it to multiple web pages, you ensure a uniform look and feel.**
- * This reduces redundancy and makes it easier to update styling elements globally**

CONCLUSION WITH CSS

- **Cascading Style Sheets (CSS) is a simple mechanism for adding style (e.g., fonts, colors, spacing) to Web documents.**
- **These pages contain information on how to learn and use CSS and on available software.**
- **They also contain news from the CSS working group.**
